

Using CamScanner

How to use CamScanner (for hardcopy homework submission)

CamScanner allows you to use your camera on your mobile phones like a scanner anywhere. It enhances the image to make it clearer. You can also save multiple images as a PDF document. Handy for submission of multiple pages of homework!

Android

[Click to download for Android](#)

iPhone

[Click to download for iPhone](#)

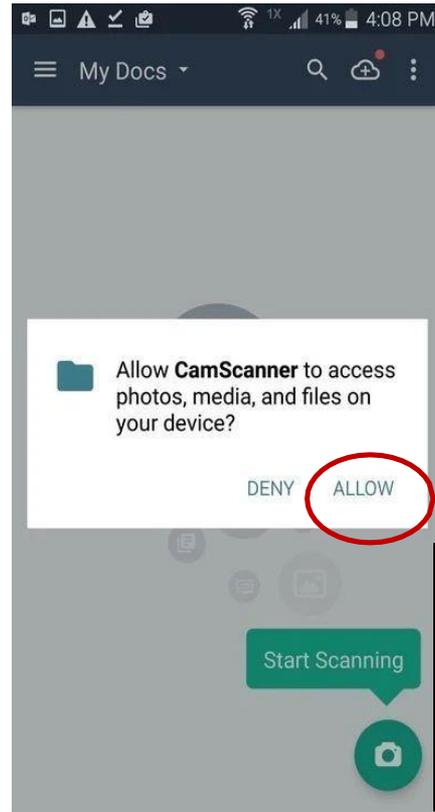

You can also search 'CamScanner' on PlayStore/AppStore.

Download the **free** version.

Please do not upgrade to a Premium Version, Basic is good enough to complete your HBL task. (Premium version is not FREE)

Click on 'Use Now'.
No need to sign in
or register.

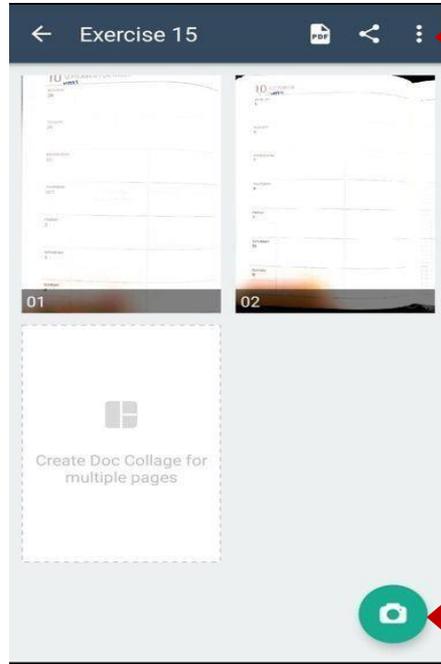

This will allow
CamScanner to
save files on
your phone.

Click on 'Start Scanning' once you are ready.

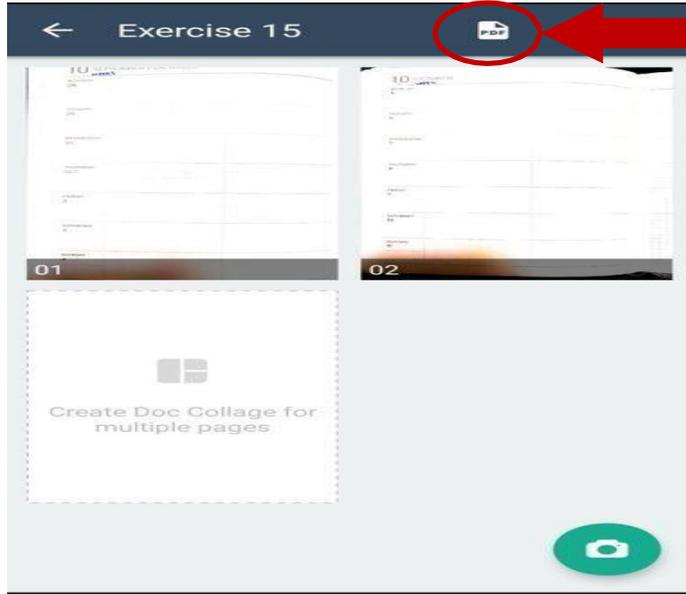

Adjust the grids to frame your work properly.

Press Next once you are done scanning.

Click for more options (rename, email to self)

Click to add more pages

Click on PDF,
then **Share**.

Select "PDF" as the format of the file you want to share. The app will then consolidate all your scanned pages as one PDF file. On the next screen, click "Share".

Uploading the pdf

You can upload the pdf to Google Classroom directly if you have downloaded the Google Classroom application
